How To Select An Object Behind Text In Word For Mac 2011

In Office 2011, I cannot find how to select a form that sits behind a paragraph In the case I am struggling with, the paragraph is inside a table cell.. I remember from Word 2008 a pointer tool that one could invoke from the floating toolbar.. But after the object is inserted in your Word document, you'll probably need to control how text wraps around it.
